Premier wax products with quality second to none

"Pelables Primo" are the Film Waxes. They are the latest innovation in liposoluble depilatory wax and transform depilation into a simple, rapid and clean operation. In fact, unlike classic depilatory waxes, they are applied in ultra-thin layers, with a lower temperature. Therefore they are warm on the skin, particularly elastic and easy to spread and do not require the use of fabric strips for hair removal. Used once and then thrown away, the result is rapid, long-lasting and 100% hygienic depilation. Pelables Primo are particularly soft, elastic waxes; perfect for those who normally choose total body waxing or who need to "touch-up" specific areas. They are excellent for the Brazilian System depilation technique. Available in Vanilla, Aloe vera, Rosa and Azulene - 1kg packs.

R250

"Traditionnelles Techno" are the Traditional Hot waxes, studied and developed to optimize the concept of "traditional" depilatory wax. They do not require the use of fabric strips for hair removal. Used once and then thrown away, they provide total hygiene. Soft to the touch with excellent spreadability, are perfect for those who normally choose total body waxing or who are used to traditional depilatory wax products. Available in Pink Titanium and Aloe vera - 1kg packs
